For Norton Sound Economic Development Corporation (NSEDC), 2009 was a year of new beginnings. In addition to continuing core programs, we established the Community Energy Fund program, purchased the Inaliq tender vessel, completed construction of the cold storage facility at the Norton Sound Seafood Center, and filled several key positions within our corporate family.

One of the most exciting new projects approved by the Board in 2009 was the NSEDC Community Energy Fund (CEF) program, which is intended to help satisfy the growing need for affordable, reliable energy infrastructure within the Norton Sound region. Through the CEF, NSEDC has set aside one million dollars for each of its fifteen member communities. The funds are to be used to assist with upgrading community power generation and distribution systems, implementing alternative/renewable energy projects, and adjusting existing power systems. NSEDC’s hope is that these projects will foster economic growth and improved quality of life in the communities by reducing energy costs and providing long-term, sustainable energy solutions. The first project to be funded by the CEF, the Unalakleet Valley Electric Cooperative (UVEC) Wind Farm, was completed in October and is expected to provide substantial diesel fuel savings, reducing energy costs in Unalakleet for years to come.

NSEDC staff has formalized the application process for the CEF program, which is administered through the NSEDC Community Benefits Department, and instructions can be found on NSEDC’s website.

Two other accomplishments in 2009 were the purchase of Norton Sound Seafood Products’ (NSSP) fourth tender vessel, the Inaliq, and the completion of the NSSP cold storage facility in Nome. The Inaliq was brought into service in June and joined the existing tender fleet the Golovin Bay, Norton Bay, Egavik, and the buying barge Besboro. Before the 2009 season, the Inaliq went through extensive shipyard work, including repowering with two computer-monitored, fuel-efficient John Deere engines and the installation of an RSW system for tendering crab. In addition to the tender vessel purchase, NSSP, in partnership with the U.S. Economic Development Administration, completed construction of the cold storage facility at the Norton Sound Seafood Center in Nome. The facility was introduced to NSSP crab and halibut operations in June. The Inaliq and cold storage facility are welcome additions to NSSP fishing operations.

NSEDC formed Siu Alaska Corporation in late 2008 to house assets that generated taxable income and in 2009 welcomed John Eckels as the subsidiary’s Chief Executive Officer and Richard Tremaine as its Asset Manager.

While continually seeking opportunities for expansion and growth, NSEDC also remains committed to continuing its existing, core programs. The NSEDC Community Benefits Department experienced another successful year for the Small Business Initiative grant program, the Consolidated Bulk Fuel program, the Community Benefit Share, and the Outside Entity Funding program.

NSEDC’s Education Employment and Training program also sponsored a number of community-based trainings and classes in addition to awarding a record amount of $622,169 in scholarships to students from the Norton Sound region.
NSEDC’s Norton Sound Fisheries Research and Development Program (NSFR&D) had another busy field season overseeing its salmon enumeration, mist incubation, and smolt projects. The Clean Waters Program improved the condition of the beaches in Gambell, Brevig Mission, Saint Michael, Stebbins, and Little Diomede and has grown so that it employs nearly double the number of seasonal employees hired in prior years. NSFR&D also saw the start of a new project in the 2009 season, as the Board approved funding for a Port Clarence Test Fishery Project under NSFR&D’s Northern Communities Fishery Development Plan. Through the project, longline fishing gear was purchased (with boats to be purchased in 2010) and the first steps were taken to assess the potential for halibut, cod, and other fisheries resources in the Port Clarence area.

Recognizing the importance of subsistence activities to residents of our member communities and to all of rural Alaska, NSEDC has consistently voiced the need to reduce bycatch to the North Pacific Fishery Management Council (Council) and directly to our harvesting partners. In April, the Council adopted a two-tier management plan for Chinook salmon bycatch that involves a simple hard cap option as well as a hard cap with an approved incentive plan agreement. The new management program will be implemented during the 2011 fishing season. Chum salmon bycatch analysis alternatives were still under review in 2009 and are expected to be defined at the Council’s June 2010 meeting in Sitka.

In July and August, NSEDC held Fishermen’s Fairs in Elim, Koyuk, and Nome. With the conclusion of the Elim and Koyuk fairs, NSEDC has hosted a fair in all fifteen of its member communities. All of the fairs were well received by community members and provided NSEDC with the opportunity to show its appreciation for the contributions which individuals and local entities have made to the region’s subsistence and commercial fisheries.

In closing, I would like to thank the Board and staff for another productive year. Over the years, NSEDC has developed a strong set of core programs and activities, which provide the basis for our efforts to support economic development and fisheries operations in the region. The potential for the CEF and other initiatives launched in 2009 to build on these successes is exciting and we look forward to realizing their potential in the coming years.

Dan Harrelson
President and Chairman
Program Overview
The Norton Sound Fisheries Research and Development Program (NSFR&D) seeks to maximize opportunities for both subsistence and commercial harvests with projects that integrate fisheries research with applied fisheries biology. NSFR&D’s priority is to help maintain sustainable populations of the region’s most heavily utilized species: king salmon, red salmon, and red king crab. In addition to efforts directed at these species, NSFR&D also administers an on-going Clean Waters beach clean-up project, manages a number of projects that focus on increasing Coho and chum salmon returns, supports research and fisheries management activities, and pursues development of new fisheries within Norton Sound. In early 2009, a third biologist and two technicians were hired to assist with NSFR&D’s increasing amount of activity.

Red Salmon Fertilization
One of NSFR&D’s projects aimed at sustaining red salmon populations is the fertilization of Salmon Lake, which has had low levels of returns for a number of years. Lake fertilization is intended to boost juvenile salmon’s survival rates, by increasing the amount of algae or phytoplankton, which in turn increases the amount of zooplankton on which the juvenile salmon feed. The fertilization project began in 1996 with NSEDC funding fifty percent of the project. NSEDC has administered the full program since 2008. Based on studies of the effect of fertilization levels, NSFR&D has adopted an approach that uses only low levels of fertilization, in order to avoid over-population of Salmon Lake with juvenile salmon. Over-population is a partial cause of the low return rates in past years, as crowding results in smaller juvenile salmon that do not survive as well at sea. The current project goal is to maintain an escapement of 30,000 adults with a subsistence harvest of approximately 10,000 fish.

Clean Waters
The Clean Waters beach clean-up project nearly doubled in size in 2009, as fifty-six people were employed on crews in Gambell, Brevig Mission, Saint Michael, Stebbins, and Little Diomede. All of the projects significantly reduced the amount of debris in the communities’ coastal areas. However, additional work will be needed in Saint Michael, Gambell, and Little Diomede. In Saint Michael, the clean-up crew encountered scrap metal from abandoned or wrecked sternwheeler boats from the early 1900s, some portions of which were declared historic relics and could not be disturbed. NSFR&D will be seeking community input from Saint Michael on how to proceed with the clean-up efforts as it cannot continue without receiving additional permits. In Gambell, a fuel shortage delayed the start of the clean-up by several weeks, which made it difficult to complete all of the necessary activities. Gambell’s clean up was also more extensive than other communities because of the amount of debris brought to Saint Lawrence Island by the strong ocean currents. In Little Diomede, additional vessel support is required for debris removal. Clean up efforts will continue when an appropriate vessel becomes available. Due to the popularity of the clean-up projects and the resulting environmental and employment benefits, NSFR&D anticipates continuing the Clean Waters beach clean-up projects.

Increasing Coho and Chum Salmon Runs
In 2009, NSFR&D continued activities related to its salmon egg planting projects in Hastings Creek and Arvil Creek. In Hastings Creek, chum salmon eggs were planted in 2004 and the first year returns were recorded in 2008. In 2009, second year returns were recorded at Hastings Creek. As in 2008, the results were encouraging and indicated that the only chum salmon in Hastings Creek were those planted by NSFR&D. The combined 2008 and 2009 results indicated the return of one adult for each original spawning fish. The initial analysis shows a return rate of half of the actual return, since roughly one-half of the returning adults strayed to the Nome or Snake rivers. The high stray rate may be due to frequent closures of the mouth of Hastings Creek from wave action.
In Anvil Creek, Coho salmon eggs were planted in 2005. It appears that the Anvil Creek planting contributed to the late return of more than fifty Coho salmon to Dry Creek, which generally has a return of only one or two Coho adults. The return results for both Hastings Creek and Anvil Creek egg plants are encouraging as both have resulted in more adults returning than the wild stocks in the area. The Coho planting seems to yield three returning adults for each adult that spawned. The wild return was roughly one returning adult for every six that spawned - a very poor survival rate. While egg takes for Coho and chum egg planting were cancelled due to poor salmon returns in northern Norton Sound, NSFR&D continues to collect salmon to inspect otolith bones, which carry a marker that identifies if the salmon was one planted by NSFR&D.

Research and Management Activities
NSFR&D works cooperatively with governmental agencies and universities on fisheries research projects in order to further the amount of data available about species in the region, provide job opportunities and training to Norton Sound residents, and provide residents with the opportunity to play a larger role in the operation and management of local fisheries. As part of this effort, NSFR&D sponsors internships with the Alaska Department of Fish and Game and the University of Alaska Fairbanks Marine Advisory Program. NSFR&D has placed salmon counting stations on the Snake, Eldorado, Pilgrim, Shaktoolik and North rivers. NSFR&D and its cooperators have also developed papers on escapement goals and return predictors for Nome River Coho salmon, Fish River smolt habitat requirements, and blue king crab morphometrics, which are currently under review.

Development of New Fisheries
In 2009, the NSEDC Board of Directors authorized a new project to investigate possible subsistence or commercial fisheries of non-salmon species near Port Clarence and the Bering Strait. The authorization was based on a review of the federal and state trawl surveys, which indicated that longline fisheries for halibut, cod and other species might be feasible. As part of this project, three sets of longline gear have been distributed in Brevig Mission and Teller and longline gear has been assembled for Wales and Diomede. NSEDC has also budgeted for boats to be purchased in 2010 for each of these communities to conduct exploratory work, in the hope that the local fishermen will discover potential for new fisheries within the Norton Sound.
Community Benefit Share
At the 2009 third quarter meeting, the Norton Sound Economic Development Corporation (NSEDC) Board of Directors declared $100,000 for the 2009 NSEDC Community Benefit Share (CBS). Throughout the eleven-year history of the CBS, NSEDC has distributed $630,000 to each member community; bringing a total investment of $9,450,000 directly into the Norton Sound region through this program.

Each member community receives an equal distribution of the share and the remittance is made to the municipal government. Through a public meeting process, the community decides how the benefit share will be utilized.

Consolidated Bulk Fuel Program
The Consolidated Bulk Fuel Program was administered for the fourth consecutive year in 2009. Through this program, NSEDC acts as a purchasing agent on behalf of participants by coordinating orders, issuing requests for proposals to fuel suppliers, evaluating the proposals, and awarding the contract. NSEDC staff then serves as a single point of contact between the fuel supplier and participants. A main attraction of this program is that NSEDC is responsible for all payments to the fuel supplier, offering participants payment plans that are payable directly to NSEDC. NSEDC does not charge interest or fees for administering this program, resulting in additional savings for all participants. Each year the program continues to expand in terms of the number of participants and the amount of fuel delivered. In 2009, twenty-four participants from fourteen communities received 1,130,767 gallons of Diesel #1 Heating Fuel.
Shoreside Infrastructure Improvements Program

To further the development and expansion of the red king crab, halibut, salmon, herring, bait, cod, and other emerging fisheries in the Norton Sound region, NSEDC applied for a grant from the Economic Development Administration, a bureau of the U.S. Department of Commerce, in 2006. The $1,500,000 grant award, along with matching funding from NSEDC, was used to construct a cold storage facility that features additional ice making capacity and live crab holding tanks. The grant also allowed NSEDC to procure a hydraulic crane for the existing Norton Sound Seafood Center (NSSC) in Nome.

The cold storage facility, located next to the seafood plant, is capable of efficiently storing 180,000 pounds of palletized and racked crab, halibut, salmon, cod, and other fish species. The new cold storage facility replaced NSSC’s previous cold storage system of portable freezer conex vans, which were costly to maintain and operate. The facility’s sheltered crab tank room hosts two 12’x10’ and two 10’x10’ holding tanks, reducing the need for immediate processing and extending the life of the harvested crab. This means less dead-loss, and in turn, increased profits to the fishermen.

NSSC’s cold storage facility in Nome opened for operations in June 2009.

and 405,003 gallons of Unleaded Gasoline delivered for a total cost of $4,439,918.47.

Fishermen’s Fairs

NSEDC continued Fishermen’s Fairs in honor of local subsistence and commercial fishermen for their hard work and continued support of Norton Sound fisheries. Fairs were hosted in Elim and Koyuk in July and in Nome in August. NSEDC has now hosted a Fishermen’s Fair in each of its fifteen member communities. A second round of fairs will begin in the summer of 2011.

Tatiana Otten (left) and Helga Takak (right) enjoyed the “Fish Pond” at Elim’s Fishermen’s Fair.

Small Business Initiative

Thirty-one applications were received for the second annual NSEDC Small Business Initiative (SBI) grant program. Five applicants received a total of $105,000 to establish or expand their small business. Grantees are listed in the chart below.

Community Energy Fund

In 2009, the Board approved the creation of the Community Energy Fund program, setting aside one million dollars for each of its fifteen member communities. The program was created as a means to facilitate the development of safe and reliable energy infrastructure in the Norton Sound region through the installation and construction of upgrades to community power generation and distribution systems, alternative/renewable energy

projects, and projects with potential for energy cost reduction.

In April 2009, the NSEDC Board approved the first $1 million CEF grant, a proposal by the Unalakleet Valley Electric Cooperative for assistance with the construction of six 100 KW Northwind windmills. The construction of the windfarm was completed in October 2009. As of May 31, 2010, the wind turbines have saved an estimated 32,000 gallons of diesel fuel, equivalent to approximately $83,200 for the residents of Unalakleet.

In 2009, NSEDC made thirty-two loans totalling $300,563.20 to local residents in the communities of Elim, Golovin, Nome, Saint Michael, Shaktoolik, Teller and Unalakleet.

Koyuk Malemute Little Dribblers

Little Dribbler Tournament in Teller, Alaska

In 2009, NSEDC made thirty-two loans totalling $300,563.20 to local residents in the communities of Elim, Golovin, Nome, Saint Michael, Shaktoolik, Teller and Unalakleet.

Large Vessel Loan Option

The Large Vessel Loan Option provides further assistance to local fishermen in acquiring suitable vessels and vessel re-powers for participation in the Norton Sound red king crab and 4D/4E halibut commercial fisheries. NSEDC designed the Large Vessel Loan Option to maximize benefits to fishermen at minimal cost to them. This option was introduced in 2001 and is still available as funds are repaid back into the program. In 2009, the terms of the Large Vessel Loan were:

Terms:
• $100,000 maximum for LLP permit holders
• $75,000 maximum for non-LLP permit holders
• 5% minimum down payment
• Credit check and 90 day delinquency limit
• 0% interest for first 3 years
• 2% interest commencing in 4th year of loan

Please visit www.nsedc.com for more loan information and applications.
Norton Sound Seafood Products (NSSP), a division of NSEDC, has supported and provided a market for commercial fisheries in the Norton Sound for over fourteen years. NSSP purchases, processes, markets, and sells herring, salmon, halibut, crab, and bait. NSSP’s facilities include the Unalakleet plant, Savoonga halibut buying station, Norton Sound Seafood Center in Nome, and buying stations in Teller, Golovin and Shaktoolik.

Housing and Transportation Assistance
Seeking to expand employment to residents outside of Nome and Unalakleet, the NSEDC Board of Directors approved a new program in 2009. The program provides housing and transportation assistance to those applicants residing in communities surrounding Nome and Unalakleet. Of the eighty-eight residents that worked at the Norton Sound Seafood Center, nineteen area residents received housing assistance to work in Nome and the halibut plant in Savoonga in 2009. Of the one hundred twenty residents employed at the Unalakleet plant, thirty-two received housing assistance.

Open-Access & CDQ Norton Sound Red King Crab
In 2009 the CDQ and Open Access fisheries ran concurrently with the seasons starting on June 15th and closing September 20th. In three hundred fifty-nine landings, four CDQ fishermen were paid a total of $85,619.78 for delivery of 28,125 pounds of crab and twenty-five Open Access fishermen were paid a total of $1,053,648.31 for delivery of 332,415 pounds of crab.

CDQ Halibut
The number of Savoonga fishermen increased from six to twelve in 2009. Using open skiffs, they delivered 25,762 pounds of halibut to the Savoonga plant with an ex-vessel value of $79,678.45.

In Nome, twelve fishermen delivered a total of 117,526 pounds of halibut with an ex-vessel value totaling $375,002.16. Each fisherman was paid an average of $31,250.17. The 2009 delivery totals were notably lower than those in 2008, as the unusual length of the 2009 crab season and inclement weather conditions that forced fishing boats into port limited the number of halibut landings.

Salmon
2009 was another successful year for salmon fishermen. The market price for Coho salmon remained strong during the season. Prices, per pound, were $1.50 for Coho salmon, $0.35 for chum salmon, and $0.25 for pink salmon. NSSP paid fishermen $0.05 less per pound for salmon delivered to tender vessels. In total, salmon fishermen received

$960,537.00 for their harvests.

Fillets were produced for retail sales at the Norton Sound Seafood Center in Nome and approximately 37,000 pounds of processed roe was recovered.

NSSP thanks the fishermen and tender vessel crews for taking exceptional care of the product.

Thank you for a great season!

Education
The NSEDC Scholarship Program has historically been one of the most distinctive benefit programs offered by the corporation. In 2009, a record total of $622,169 was awarded to students seeking higher education at an accredited college or vocational school. Of this total, $235,335 was awarded in the first quarter to one hundred twenty-six students; $50,500 was awarded in the second quarter to twenty-six students; $316,334 was awarded in the third quarter to one hundred sixty-three students; and $20,000 was awarded in the fourth quarter to ten students.

Employment
In partnership with Glacier Fish Company (GFC) and Aleutian No. 1 LLC, NSEDC offers employment opportunities to regional residents on commercial fishing vessels for the Bering Sea pollock and Bering Sea/Aleutian Islands crab fisheries. Employment on these vessels represents an important opportunity for Norton Sound residents to gain greater knowledge and experience with Bering Sea commercial fishing. These jobs also allow residents to earn and bring home significant wages. In the first quarter, the F/T Northern Glacier, F/T Alaska Ocean, C/P Glacier Bay, and F/V Aleutian No. 1 crews included eighteen Norton Sound residents who brought home a combined total of $149,308 in crew share wages. In the second quarter, the F/T Pacific Glacier, F/T Northern Glacier, F/T Alaska Ocean, C/P Norton Sound, and C/P Glacier Bay crews included twenty-five Norton Sound residents who earned a combined total of $269,905 in crew share wages. In the third quarter, the F/T Pacific Glacier, F/T Alaska Ocean, C/P Norton Sound, and F/V Aleutian No. 1 crews included thirty Norton Sound residents who earned a combined total of $256,879 in crew share wages. In the fourth quarter, the F/T Pacific Glacier, F/T Alaska Ocean, C/P Norton Sound, C/P Glacier Bay, and F/V Aleutian No. 1 crews included twenty-two Norton Sound residents who earned a combined total of $116,248 in crew share wages.

Training
The Education, Employment and Training (EET) program helps to support the training efforts of various organizations in each of NSEDC’s member communities by sponsoring community-based training programs and classes throughout the year. In 2009, community-based training sponsorships were provided to help fund Inupiaq language classes in Wales and Unalakleet, the Mary’s Igloo Traditional Council Sled Building Class, a Gambell "Behind the Wheel" drivers education class, a Brevig Mission Sewing Class, a crab pot class in Savoonga, and a spoon making (Qayuutaq) class in Koyuk.

The EET Program also provided funding for Norton Sound residents to attend an Indian Valley Seafood Processing Class, a marine safety drill instructor course, a hazard analysis and critical control point training class, and Alaska Vocational Technical Center seafood processing classes.

2009 CDQ FISHERIES

Quota Management
In 2009, NSEDC actively managed the harvest of fish quota in over twenty commercial fisheries off the coast of Alaska – including both Community Development Quota (CDQ) and Individual Fishing Quotas (IFQ).

NSEDC enters into contractual agreements with harvesters and processors to share in revenues generated from the harvest of CDQ and IFQ resources and the eventual sale of related products. NSEDC benefits from these arrangements through the payment of royalties or lease fees, sharing of profits and distribution from ownership interests, in addition to employment opportunities created for Norton Sound residents.

2009 CDQ Fisheries
NSEDC conducted directed CDQ fishing operations for Alaska pollock in the Bering Sea, Pacific cod and sablefish in the Bering Sea/Aleutian Islands, golden king crab (also known as brown crab) in the Eastern Aleutian Islands, red king crab in Bristol Bay and Norton Sound, opilio and bairdi tanner crab in the Bering Sea, Greenland turbot and arrowtooth flounder in the Bering Sea, Atka mackerel in the Aleutian Islands, and Pacific halibut in IPHC Area 4D. There was no directed fishery for CDQ yellowfin flounder, flathead sole and rock sole during 2009. The harvest of these flatfish quotas continues to be particularly difficult due to the high levels of Total Allowable Catch (TAC) in the open access fisheries and lower product values.

NSEDC works with a variety of harvesting partners in the pursuit of these target fisheries. NSEDC also continues working with longstanding harvesting partners – Glacier Fish Company (GFC) and United States Seafood (USS) – as well as taking advantage of new opportunities and business relationships.

Although 2009 quota levels were lower in some key fisheries such as pollock, and values were depressed for many seafood products such as cod, NSEDC still had another good year, generating over $11.6 million in royalties in the harvest of these CDQ fisheries.

2009 IFQ Fisheries
NSEDC started acquiring IFQ in 1997 and now owns access to a range of fisheries including sablefish in the Bering Sea/Aleutian Islands and Gulf of Alaska, halibut in IPHC Area 3B, and a variety of crab fisheries.

In 2009, NSEDC generated almost $1.6 million in lease fees and royalties from harvests in these fisheries while working with a wide range of harvesters. A summary of harvests and harvesters are shown in the table below.

NSEDC thanks our harvesting and processing partners for another successful year!

</table>
Siu Alaska Corporation (Siu) is a for-profit subsidiary formed and 100% owned by NSEDC. The purpose of Siu is to earn profits and return dividends to NSEDC for its non-profit activities. 2009 was Siu’s first full year of operation. NSEDC provided Siu with a strong initial asset base consisting of investments in Aleutian No. 1 LLC, PS Fisheries LLC, GB Fisheries LLC, and Glacier Fish Company LLC. Siu completed start-up activities in 2009; the corporation is managing its existing assets and continually exploring opportunities for growth.

**Glacier Fish Company**

Despite Total Allowable Catch (TAC) reductions of over eighteen percent and fluctuating market prices, Glacier Fish Company (GFC), joined by new partner Nissui, was profitable in 2009. The company harvested over 170 million pounds of fish and sold over 53 million pounds of processed fish. GFC also completed repairs on the F/T Pacific Glacier, which suffered an on-board fire in 2008, and prepared the vessel for the pollock B season. Thank you to all the employees at Glacier Fish Company for a safe and successful year.

**F/V Aleutian No. 1**

In 2009, the F/V Aleutian No. 1 was upgraded to enhance operating efficiency and increase safety for the crew. The crew, including Captains Rip Carlton and Rick Alvarez, Norton Sound’s own Luke Smith from Golovin and White Mountain, and Sam Goodhope from Brevig Mission, had a successful season. They fished primarily for golden king crab along the Aleutian Islands. The F/V Aleutian No. 1 landed approximately 1.2 million pounds of crab, which enabled the LLC to make distributions, including to its member the Bering Sea Women’s Group.

**F/V Pacific Star**

In 2009, the F/V Pacific Star worked off the coasts of California and Oregon under a charter for ocean bottom surveying and mapping. The five-year certification check was due in 2009, though it required a substantial amount of work, it positioned the vessel for smooth sailing in the coming years.

Siu looks forward to the continued success of these enterprises and to developing new investments, in order to provide NSEDC with the resources to fulfill its mission and goals in the Norton Sound region.
**REGIONALLY OPERATED VESSELS**

**T/V Norton Bay**  
**Length:** 39 feet  
**Products:** Supports NSSP buying and processing operations for local fishermen in the Norton Sound region.

SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Description of Business

Norton Sound Economic Development Corporation (Company) is a non-profit corporation organized to represent the Norton Sound region of Alaska in the Community Development Quota (CDQ) program. The CDQ program was established by the federal government in 1992. The program was established by reserving 7.5%, (subsequently increased to 10%), of the total allowable catch (TAC), of pollock for the Bering Sea and Aleutian Islands areas of Alaska. The reserve was then allocated to the CDQ groups. The program has been expanded to include other species and a greater portion of the pollock TAC. The Company’s 2009 and 2008 pollock allocation was 17,930 and 22,000 metric tons, respectively. The CDQ allocation program is on a calendar year basis and allocations awarded cannot be taken in subsequent years if the previous year’s allocations were not fully utilized.

As a result of Section 416 of the Coast Guard and Maritime Transportation Act as of 2006, which amended Section 305(i) (1) of the Magnuson-Stevens Fishery Conservation and Management Act, the Company’s receipt of CDQ allocations was fixed at the same percentage level as its 2006 allocations for all allocated species and such percentages may not be changed until 2012. The Company has entered into an agreement for the duration of the CDQ allocation with a harvester to harvest the pollock allocations. Amounts received vary depending upon the specific availability and market prices.

The Company’s primary purpose is to develop and sustain new and ongoing economic activity in the Norton Sound region. The Company’s mission outlines its intentions to provide a balance between local economic development oriented towards the residents in the region and active participation in the distant-water fisheries in the Bering Sea and Aleutian Islands. The Company implements programs to educate, train, and employ people of the region; build infrastructure to help support the new and existing fisheries; start new fisheries through locally initiated development efforts; support the local salmon, herring, crab, and halibut fishermen; restore salmon runs in the region for both commercial and subsistence users; provide gear, vessels, and secure equity interests in companies and vessels. The Company has not entered into any significant long-term agreements or commitments other than its agreements with the harvesters of its CDQ allocations.

In 2008, the Company sold 25% of its interest in Glacier Fish Company, LLC and acquired 100% ownership in PS Fisheries, LLC.

In 2009, Siu Alaska Corporation sold 25% and donated 25% of its 100% interest in Aleutian No. 1, LLC, dissolved its investment in Ocean Olympic, LLC and acquired 100% of Pacific Star Fisheries, LLC.

Accounting Estimates and Assumptions

In preparing the financial statements, management is required to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities as of the date of the financial statements and revenue and expenses for the reporting period. Actual results could differ from the estimates and assumptions.

Principles of Consolidation

In 2008, the consolidated financial statements include GB Fisheries, LLC, PS Fisheries, LLC and Siu Alaska Corporation, a wholly owned subsidiary formed in 2008. In 2009, the consolidated financial statements include Aleutian No. 1, LLC, PS Fisheries, LLC and Pacific Star Fisheries, LLC, which are consolidated into Siu Alaska Corporation. Additionally, the consolidated financial statements include the NSEDC Education Foundation. All significant intercompany transactions and accounts have been eliminated in the consolidation.

Basis of Presentation

The accompanying financial statements include assets, liabilities, net assets, and financial activities for those programs for which the Company exercises fiscal and operational control.

The financial statements are prepared using the economic resources measurement focus and the accrual basis of accounting. Revenues and support are recorded when earned and expenses are recorded when a liability is incurred, regardless of timing and related cash flows. Contingent royalty payments are recognized when the amount is fixed and determinable and collection is assured.

Fair Value of Financial Instruments

The Company must disclose its estimate of the fair value of material financial instruments, including those recorded as assets or liabilities in its financial statements and derivative financial instruments.

The following financial instruments are recorded at fair value or at amounts that approximate fair value: (1) cash and cash equivalents, (2) investments, (3) receivables, net, (4) certain other current assets, (5) accounts payable and (6) other current liabilities. The carrying amounts reported in the balance sheets for the above financial instruments closely approximates their fair value due to the short-term nature of these assets and liabilities, except for the Company’s investments. The carrying amounts of the Company’s investments were determined based on quoted market prices.
The carrying amount of the notes receivable approximates fair value for those financial instruments with interests at variable rates, as those rates approximate current market rates for notes with similar maturities.

The fair value of the notes receivable that do not have set consistent payment cannot be determined since there is no active market to compare.

**Cash and Cash Equivalents**
The Company considers cash and short-term instruments with original maturities of 90 days or less to be cash equivalents.

**Investments in Marketable Securities**
The Company carries investments at fair value. The change in the fair value is included in the consolidated statement of activities.

Investments in marketable securities consist of mutual funds, equity securities, U.S. Agency obligations, and corporate debt securities. For purposes of calculating realized gains and losses, cost is determined by the specific identification method on a trade date basis.

Classification of investments as short-term and long-term is based on the length of time management intends to hold the investment. Management intends to hold short-term investments less than one year.

**Inventory**
Inventory is valued at the lower of aggregate cost or fair value (first in, first out).

**Short-Term Notes Receivable**
These amounts represent amounts due from Communities and Village Entities for bulk fuel purchases.

**Investments in Limited Liability Companies**
The equity method of accounting is used to account for the Company’s investment in the Glacier Fish Company, LLC, Ocean Olympic, LLC and Glacier Bay Fisheries, LLC, whereby the Company records its proportionate share of the LLC’s net income or loss.

Generally Accepted Accounting Principles (GAAP) provides guidance in determining when variable interest entities should be consolidated in the financial statements of the primary beneficiary. An evaluation of Norton Sound Economic Development Corporation’s investments in variable interest entities indicated that consolidation is not required under GAAP.

**Investment in Individual Fishing Quota**
The Company has investments in fishing privileges under the Individual Fishing Quotas (IFQ) program, which was established by the federal and state governments to allocate halibut, sablefish, and various crab species to the established fishers based on historical catch. IFQ’s are considered an indefinite life intangible asset and are carried at cost and measured annually for impairment.

**Furniture and Equipment**
Furniture and equipment acquisitions are capitalized at cost when purchased or at fair market value of date of gift, when donated. Depreciation is recorded using the straight-line method over the estimated useful lives of the assets, generally two to ten years.

**Provision for Loans, Accounts Receivable, Notes, and Contract Losses**
The Company provides for loans, accounts receivable, notes, and contract losses based on the estimated losses determined through management’s periodic reviews of the outstanding loan portfolio. The estimation of losses considers prior loan charge-offs and recoveries against the allowance as well as the economic conditions and the character of the credit risks. Allowances for loans, accounts receivable, notes, and contract losses are subjective and may be adjusted in the future.

**Community Development Quota**
The fair value of the quota received by the Company from the federal government is not considered to be determinable within reasonable limits. Accordingly, no value has been assigned to the quota in the financial statements.

**Income Taxes**
The Company is exempt from the federal and state income taxes under provisions of Section 501(c) (4) of the Internal Revenue Code, except for taxes on unrelated business income. In evaluation of unrelated business income, the Company follows GAAP, when accounting for uncertainty in income taxes. The Company’s policy is to include penalties and interest associated with income taxes in income tax expense.
Commitments and Contingencies
Liabilities for loss on contingencies arising from claims, assessments, litigation, fines and penalties, and other sources are recorded when it is probable that the liability has been incurred and the amount of the assessment or cost can be reasonably estimated.

Designated Cash and Investments
The Company’s Board of Directors has designated $2,403,272 and $3,257,582 in cash and cash equivalents and $6,969,299 and $4,595,312 of long-term investments at December 31, 2009 and 2008, respectively for the Education Endowment Fund. As part of the CDQ program and past approved Community Development Plans, the Company previously contributed a portion of the CDQ proceeds to the Education Endowment Fund, which is intended to finance training and scholarships.

- Investment in marketable securities, long-term 15,506,092
- Restricted investment in marketable securities 4,595,312
  **Total**: $46,452,021

Investment income, net consists of the following at December 31, 2008:

- Realized (losses) gains, net $(5,191,894)
- Dividend and interest 2,955,273
- Unrealized gains (losses), net change for the year (13,639,849)
- Investment management fees (484,718)
  **Total**: $(16,361,188)
Included in investment related line items in the financial statements are certain financial instruments carried at fair value. Other financial instruments are periodically measured at fair value, such as when impaired, or for certain bonds and preferred stock when carried at the lower of cost or market.

The fair value of an asset is the amount at which the asset could be bought or sold in a current transaction between willing parties, that is, other than in a forced or liquidation sale. The fair value of a liability is the amount at which that liability could be incurred or settled in a current transaction between willing parties, that is, other than in a forced or liquidation sale. Fair values are based on quoted market prices when available. The Company does not have investments for which quoted market prices are not available.

The Company’s financial assets and liabilities carried at fair value have been classified, for disclosure purposes, based on a hierarchy defined by generally accepted accounting principles. The hierarchy gives the highest ranking to fair values determined using unadjusted quoted prices in active markets for identical assets and liabilities (Level 1) and the lowest ranking to fair values determined using methodologies and models with unobservable inputs (Level 3). An asset’s or a liability’s classification is based on the lowest level input that is significant to its measurement. For example, a Level 3 fair value measurement may include inputs that are both observable (Levels 1 and 2) and unobservable (Level 3). The levels of the fair value hierarchy are as follows:

- Level 1 — Values are unadjusted quoted prices for identical assets and liabilities in active markets accessible at the measurement date.
- Level 2 — Inputs include quoted prices for similar assets or liabilities in active markets, quoted prices from those willing to trade in markets that are not active, or other inputs that are observable or can be corroborated by market data for the term of the instrument. Such inputs include market interest rates and volatilities, spreads and yield curves.
- Level 3 — Certain inputs are unobservable (supported by little or no market activity) and significant to the fair value measurement. Unobservable inputs reflect the Company’s estimate of what hypothetical market participants would use to determine a transaction price for the asset or liability at the reporting date.

The following table provides information as of December 31st about the Company’s financial assets measured at fair value on a recurring basis.

<table>
<thead>
<tr>
<th>Level 1</th>
<th>Level 2</th>
<th>Level 3</th>
<th>Total</th>
</tr>
</thead>
<tbody>

</tr>
</tbody>
</table>

Given the narrow definition of Level 1 and the Company’s investment asset strategy, all of the Company’s investment assets are classified in Level 1. Changes in investments are presented on the statement of activities as investment income or loss.

**ACCOUNTS RECEIVABLE**

</tbody>
</table>

Other notes receivable of $2,417,137 is an interest only note due from BAT Fishing LLC, secured by fishing quota shares. Interest is at prime plus .25% and payments started on January 15, 2009 and continue through January 15, 2014.

Loans to individuals have scheduled repayments over one to seven years at 0% to 2%. The Company waived interest on loans to individuals from 1993 through 2009 due to the economic disaster in the fishing industry. Principal repayments are primarily made through individual payments and from a portion of the proceeds from the sale of the individuals’ commercial harvests; accordingly, the notes are considered long-term in nature. These notes are secured by the equipment or vessels purchased with borrowed funds.

The allowance for doubtful accounts was $572,784 and $526,512 and the expense recognized for doubtful accounts was $89,845 and $36,640 at December 31, 2009 and 2008, respectively.

**PROPERTY, PLANT, AND EQUIPMENT**

Property, plant, and equipment consist of the following at December 31:

<table>
<thead>
<tr>
<th></th>
<th>2009</th>

</tr>
<tr>
<td>Net property, plant, and equipment</td>
<td>$12,179,081</td>
<td>$8,656,806</td>
</tr>
</tbody>
</table>

Depreciation expense for 2009 and 2008 was $1,130,759 and $588,150, respectively.

**PREPAID RENT LEASES**
The Company participated in the construction and improvement of the City of Nome Small Boat Harbor by paying the City of Nome $550,000 in 1998. In October 1999, in return for its payment, the Company executed a real property and preferential use agreement for approximately 40,000 square feet of Small Boat Harbor property and preferential use of that portion of the mooring and docking space immediately adjacent to the leased premises for an initial term of 35 years, and other considerations. In March 2006, the Company paid an additional $555,100 for improvements to the harbor. The payments are being amortized over the life of the agreement. Amortization expense for the year ended December 31, 2009 and 2008 was $34,856 for each year.

**EMPLOYEE RETIREMENT PLAN**
The Company has a defined contribution employee retirement plan covering all employees who are at least 18 years of age and have attained 1,000 hours of service with the Company. The Company expensed $95,818 in 2009 for its contributions and $91,546 in 2008.

**OPERATING LEASES**
The Company leases Anchorage office space, the Unalakleet plant and office, and space in White Mountain under lease agreements. Rent expense was $278,017 and $319,414 for the years ended December 31, 2009 and 2008, respectively. The Company is expected to pay $248,646 in future minimum lease payments, for the next five years.

**UNRELATED BUSINESS INCOME**
The Company has reported to the Internal Revenue Service and the State of Alaska unrelated business income and paid unrelated business income tax, with respect to its 2005, 2006, 2007, and 2008 fiscal years. The Company believes that it has taken the appropriate steps to resolve any potential tax liability for its past years, and the Company is not under either a federal or state audit. The rules regarding the assessment of tax for past years are not certain, however, and no assurance can be given that neither the Internal Revenue Service nor the Alaska Department of Revenue will assert the Company is liable for tax for years prior to 2005.
At December 31, 2008 the Company recorded income tax payable of $823,323 and $3,956,662 in 2007 associated with its 2005 return, paid $3,626,811 for its 2006 return during 2007, and recorded income tax payable at $330,000 for a refund that was received of this amount, $43,369 was paid in 2009. The federal income tax liability for 2008 is $2,979,199 of which $2,445,024 was prepaid and the income tax liability for the State of Alaska is $903,579 of which $733,152 was prepaid. The underpayment of $704,602 has been accrued as income tax payable. Penalties and interest of $118,721 for 2008 and $70,645 for 2007 were accrued as income tax payable. $519,849 of this was paid to the IRS in 2009 and $303,475 was paid to the State of Alaska in 2010. The Company believes that none of its activities subject it to taxation of unrelated business taxable income for 2009. However, all subsidiaries conduct activities which are subject to federal and state taxation (Note XII).

GEOGRAPHIC AND BUSINESS CONCENTRATION
The Company’s primary operations are involved in the fisheries of the Norton Sound and Bering Sea regions of Alaska. The program revenue received by the Company is largely a result of the Company’s ability to contract the harvesting of the CDQ allocations received from the federal government. The majority of the Company’s sales transactions were to Glacier Fish Company, LLC. The Company hires the majority of its seasonal labor from the Norton Sound region. As a result of the geographic and natural resource concentration, the Company’s growth and activities depend upon the viability of the North Pacific fisheries of pollock, halibut, crab, and other species, the continued allocation of harvesting quotas by the federal government, and the ability to obtain skilled labor from the region. Any deterioration or improvements in these fisheries, quota allocations, or the labor pool could have a significant effect on the Company.

DISPUTES AND CLAIMS
The Company is involved in various disputes and claims. Due to the early stages of these matters, the Company’s legal counsel is unable to provide opinions as to the outcome or quantify any potential liability. Management believes the resolution of these matters will not have a material effect on financial position, results of activities, or cash flows.

INCOME TAXES
The Company is subject to income tax only from the activities of its for-profit subsidiary, Siu Alaska Corporation, which is consolidated with Aleutian No. 1, LLC, PS Fisheries, LLC, Pacific Star Fisheries, LLC, GB Fisheries, LLC and Glacier Fish Company, LLC.

The significant types of temporary differences and carry forwards that give rise to deferred taxes are federal and state net operating loss carry forwards, federal and state contribution carry forwards, state income tax, education credit carry forward, and book to tax differences on LLC K-1’s.

The components of the net deferred income taxes are as follows:

<table>
<thead>
<tr>
<th></th>
<th>2009 Federal</th>
<th>2009 State</th>
<th>2009 Total</th>
</tr>
</thead>
<tbody>
<tr>
<td>Noncurrent deferred tax asset</td>
<td>$1,733,604</td>
<td>610,491</td>
<td>2,344,095</td>
</tr>
<tr>
<td>Noncurrent deferred tax liability valuation allowance</td>
<td>(2,472,158)</td>
<td>(683,479)</td>
<td>(3,155,637)</td>
</tr>
<tr>
<td>Total noncurrent deferred tax liability</td>
<td>$(738,554)</td>
<td>(72,988)</td>
<td>(811,542)</td>
</tr>
</tbody>
</table>

A valuation allowance is provided when it is more likely than not that some portion or all of the deferred tax assets will not be realized. As of December 31, 2009, Siu Corporation has remaining NOLs of approximately $4,220,795 for Federal income tax purposes and $4,220,795, for Alaska State income tax purposes. The NOLs, if not utilized, will begin to expire in 2029.

As of December 31, 2009 Siu Alaska Corporation has remaining contribution carry forwards of approximately $778,442 for Federal income tax purposes and $578,442 for Alaska State income tax purposes. The Alaska Income Tax Education carry forward for 2009 is approximately $150,000. These carry forwards, if not utilized, will begin to expire in 2030.

The net accumulated book to tax differences on LLC K-1’s for 2009 is approximately $(1,171,372).

CONCENTRATION CREDIT RISK
The Company maintains unrestricted, restricted cash, and cash equivalents at a financial institution located in Alaska. Accounts at the institution are secured by Federal Deposit Insurance Corporation up to $250,000. At December 31, 2009 and 2008 amounts in excess totaled $9,937,286 and $14,452,605, respectively. However, the Company maintains funds which are held in an overnight sweep account.

The Company maintains investments with UBS, Scottrade, and Charles Schwab. Investments are protected by the Securities Investor Protection Corporation (SIPC). The SIPC protects customers up to $500,000 per customer.

SUBSEQUENT EVENTS
Management has evaluated subsequent events through June 3, 2010, the date which the financial statements were available for issue and no issues requiring disclosure were identified.
Description of compensation policy for directors:
Per diem and honorariums are paid to directors for each day meetings are attended. The rate of per diem is $350 per day. Honorarium is paid at the rate of $250 per meeting. An additional $50 is paid to the Chairman of the Board for each Board meeting.

Total amount paid to directors:
Compensation for NSEDC’s seventeen directors (fifteen current and two whose terms ended in 2009) was $430,554 in 2009.
Compensation for Siu Alaska Corporation’s nine directors (seven current and two whose terms ended in 2009) was $24,317.
Compensation for NSEDC Education Foundation’s five directors was $21,588.

Employee Compensation:
Top five highest paid personnel within NSEDC and the majority-owned subsidiaries

Vice-president and Chief Executive Officer Janis Ivanoff earned $151,041.67; Chief Operating Officer Simon Kinneen earned $124,941.59; Education, Employment and Training Coordinator Jerry Ivanoff earned $97,107.42; Controller Rick Walicki earned $93,337.50; and Norton Sound Fisheries Research & Development Coordinator Charlie Lean earned $88,093.83.

Siu Alaska Corporation President and Chief Executive Officer John Eckels earned $106,250.00 in 2009. Asset Manager Richard Tremaine earned $52,050.65 as an employee of NSEDC (Jan-Jun) and $61,677.72 as an employee of Siu Alaska Corporation (Jun-Dec).

NSEDC Education Foundation President and Executive Director Barb Nickels earned $42,826.83.

Related Party Transactions:
Description of any transactions over the amount of $20,000 with any director or their family members, include:
- None

Legal proceedings involving directors:
Description of any legal proceedings in which a director has an interest adverse to the CDQ Entity, including the name of the director.
- None

Professional fees:
List of totals*

Legal .................................. $643,497.66
Consulting......................... $813,453.37
Accounting......................... $171,847.95
Lobbying........................... $17,918.00

*Includes those professional fees incurred as General and Administrative Expenses (see schedule on page 14) and those incurred as non-administrative expenses.

Auditor Relationship
Auditor is Altman, Rogers & Co.

Description of any disagreement by the CDQ Entity with any auditor in the past two years:
- There were no disagreements with Altman, Rogers & Co. for 2009 and 2008.

Description of any non-audit services supplied by the auditor with disclosure of the fees paid for the non-audit services as a percentage of the total fees paid to the auditor:
Non-audit service was for tax services related to the preparation of 990 forms. Total fees for non-audit services amounted to $18,200 or approximately 15% of total fees paid to Altman, Rogers & Co.

Committees

Nomination or compensation functions, including a description of the committee’s functions and dates of any meetings held by the committee:

- Executive Committee
  The Executive Committee members for 2009 were Dan Harrelson, Chairman; Dean Peterson, Vice-Chairman; Frank Katchatag, Sergeant-at-arms; Elvina Naranjo and Harvey Sookiayak.

  The Executive Committee is responsible for planning the work of the full Board, setting meeting schedules and agendas, ensuring accountability of operations of the Corporation, setting guidelines between regular meetings, clarifying policy, and referring work or issues to other committees. The Executive Committee may exercise all of the authority of the full Board in the management of the Corporation, except where action of the Board of Directors is otherwise specified by statute, regulation, the bylaws, or the articles of incorporation.

  The committee held meetings on January 26, April 22, July 28, November 3, and December 9, 2009.

- Compensation Committee
  The Compensation Committee members for 2009 were Dan Harrelson and Harvey Sookiayak.

  The Compensation Committee is responsible for reviewing requests by NSEDC management for increases in pay or annual bonuses for NSEDC officers and staff, and shall recommend approval or denial of such requests to the Board of Directors.

  The committee did not meet in 2009.
