## 2006-2008 CDQ Allocations Announced – NSEDCC’s Pollock Quota Remains at 22%

The initial allocations for pollock and other fish species in the Community Development Quota (CDQ) Program were announced for the 2006-2008 cycle in February. These allocations result in payments to NSEDCC for use in funding our programs and projects, as well as investments.

*Members of the CDQ Team at the Public Hearing held in November 2004*

NSEDCC held high hopes for this allocation round as our population is the

largest among the six groups in the program, the benefits to our communities are second to none, and shrewd financial management has put us at the top of the list in net worth. We touched on each of these points as we developed our Community Development Plan (CDP) which is the application put together for submittal to the State CDQ Team, who makes the initial CDQ recommendations. Additionally, the last CDQ cycle (2003-2005) resulted of a loss of one percent of pollock (roughly \$1 million over the three year cycle), and this cut was based on three points: 1) the petitioning for changing the CDQ program regulations by NSEDCC (we have long fought for the ability to do non-fisheries related projects to help all of our communities); 2) the purchase of a longline fishing vessel; and 3) our Community Benefit Share program. After the 2003-2005 allocation, we received judgments from the National Marine Fisheries Service regarding these bases for cuts, and were found to be within our bounds, and therefore wrongly reduced in our allocation.

With these factors considered, NSEDCC was somewhat disappointed with the 2006-2008 allocation decisions as our quotas were largely unchanged. However, what we have received will be put to very good use and residents of NSEDCC member communities should expect worthwhile projects to continue.

### Highlights of the allocation recommendations:

Bering Sea Pollock	22%	
Pacific Cod	18%	
Bering Sea Sablefish	16%	(down from 18%)
Atka mackerel	14%	(down from 17%)
Yellowfin sole	11%	(up from 7%)
Rock sole	16%	(up from 11%)
4D Halibut	30%	
4E Halibut	5%	(up from 0%)
Bristol Bay Red King Crab	18%	
Norton Sound Red King Crab	50%	
East Aleutian Golden King Crab	21%	(new to CDQ Program)
Adak Red King Crab	21%	(new to CDQ Program)
Bering Sea Bairdi Crab	18%	
Bering Sea Opilio Crab	18%	

Notable for Norton Sound Fishermen is the allocation of 4E Halibut, which is new to NSEDCC. In the past, NSEDCC has only received 4D Halibut (in the St. Lawrence Island area) but has been able to transfer that fish to 4E (closer to the mainland). This allocation is in recognition of our fishermen utilizing this quota through our expanding local fleet. Unfortunately, the Norton Sound Red King Crab quota remained at 50%, so NSEDCC management will continue to try to work with Yukon Delta Fishermen’s Development Association (YDFDA) to obtain their quota.

## Norton Sound Fisheries Research and Development Program

The Norton Sound Fisheries Research and Development Program (NSFR&D) has been undergoing some changes during the winter season. NSFR&D, which combines salmon research and restoration and fisheries development projects, is in an expansion phase in an effort to respond to the needs of fishermen, for both the ailing salmon populations and the need for more fishery activity throughout the region.

NSFR&D started out under the Community Benefits Department, but recently was moved under direct supervision of the President/CEO. In addition to this, a new program was listed in NSEDC's 2006-2008 Community Development Plan (CDP). The Clean Waters Program will start in 2006, and is designed to hire local crews from NSEDC communities to help mitigate effects of human-induced debris in fresh and marine waters and shores, as well as other habitat-related projects.

At a recent NSEDC Board of Directors meeting there was more activity

regarding the NSFR&D Program and its expansion, including an additional biologist and property acquisition. The board has approved a job description and the hiring of another fishery biologist to assist the NSFR&D Director in all aspects of the program. This person will be a full-time employee based within the region, and will be devoted to expanding the scope and area of in-region projects. The Fisheries Biologist position will be located in Nome, but will be responsible for activity throughout the region.

The issue of a facility for use by the NSFR&D Program was also addressed at this meeting. The expansion of the program has been making the need for such a facility evident, and with the addition of full-time staff in Nome, the time for this idea has come. The property will include office space, apartments for transient staff use, laboratory/incubation areas and storage. Other possibilities include an area for training, meetings, etc. The board has voiced their excitement for expansion

*John Mikulski and Arlo Hanningan*

within the region, and this is echoed by NSEDC staff.

The NSFR&D staff is gearing up for another busy summer in the region. Continuing research projects with LGL Environmental Research Associates will take up a large amount of time, as they are to provide us with a lot of information regarding the life history and survival of salmon. Juvenile studies will comprise a majority of this work, from which we hope to be able to draw some conclusions from after the upcoming season. We are also planning on expanding the Mist Incubation projects this summer, working on a larger scale basis in river systems (on the order of 400,000 eggs as opposed to 50,000 eggs in 2004). We have received approval by the Norton Sound Regional Planning Team for these projects, and are in the application process with the Alaska Department of Fish and Game. These incubation projects will occur out of Nome this summer, but are considered to be a stepping-stone to expansion throughout Norton Sound communities in need of such technology.

*Vaughn Munn and Matt Nemeth*

## NSEDC Proposal Policy

Due to the large amounts of requests NSEDC receives, a new proposal policy was created by the Board of Directors. Under this new policy, proposals are reviewed by the Board biannually at their April and October Quarterly Meetings. The deadlines for proposals are March 10<sup>th</sup> and September 10<sup>th</sup>. When submitting your proposals please be aware of the new deadlines and make sure your proposal packages are complete.

### A complete proposal package must include:

- Letter of Request
- Scope of Work
- Budget
- Matching Funds
- Community Support
- Project/Activity Timeline
- Long-term Sustainability
- Service, Activity, or Project

### And Explain:

- Whether Service, Activity, or Project is NSEDC or Community Run
- How project is Fisheries Related

**Proposal Deadlines –  
March 10<sup>th</sup> & September 10<sup>th</sup>**

## NSEDC Sponsored Internship

Hello everyone! My name is Adrienne Blatchford. I was born in Alaska, and raised in Unalakleet. I am a single mother of two boys, Genesis and Nikita. This past fall, I moved back to Unalakleet from Anchorage. The Native Village of Unalakleet recently hired me on as an intern, through NSEDC. My position will last for four months. Basically, I cover all of the duties an administrative assistant would; answering and screening calls, sorting and distributing mail, typing minutes and memos, filing paperwork, keeping the calendar, and most importantly, reporting to the boss. I would like to thank NSEDC and the Native Village of Unalakleet for providing me this opportunity to expand my skills. Qyaanaqpaq!

## NSEDC Staff

Eugene Asicksik  
President & Chief Executive Officer

## Changes in the NSEDC Board of Directors

At the end of 2004, the NSEDC Board Representatives from the communities of Brevig Mission, Diomed, Shaktoolik, Unalakleet, and White Mountain were up for election. We would like to congratulate Walter Seetot (Brevig Mission), Mary Menadelook (Diomed), Harvey Sookiyak (Shaktoolik), and Dan Harrelson (White Mountain) on their re-election to the Board of Directors, and welcome William Johnson as the new Board of Director representing the community of Unalakleet. Also, we are happy to have Truman Kava of Savoonga return as a Board Member.

Recent changes to the Board of Director Officers include new Chairman Dan Harrelson, Vice-Chairman Don Stiles, Secretary Dean Peterson, Treasurer Harvey Sookiyak, and Sergeant-at-Arms Frank Oxereok, Jr. These Officers also make up the Executive and NSIC Advisory Committees.

## At-Large NSEDC Board Members Elected

The NSEDC Board of Directors recently selected the following At-large NSEDC board members: Jack Carpenter and Henry Ivanoff for the Finance Committee, Eric Osborne and Steve Ivanoff for the Fisheries Development Committee, and Janice Dickens and Paul Ivanoff III for the Scholarship Committee. At-large members attend the committee meetings and assist the NSEDC committees to which they are assigned. Congratulations to this year's at-large members!

# White Mountain & Golovin Multi-Purpose Buildings

In May of 2001, Chinik Eskimo Community and the Native Village of White Mountain were each awarded a grant from the Economic Development Administration (EDA) of the U.S. Department of Commerce intended to diversify the local economy in wake of a string of poor fish returns to the region. Both Golovin and White Mountain opted to use the grants, one for \$990,000 and one for \$850,000, respectively, towards the construction of multi-purpose buildings. As the planning process proceeded, it became clear that the EDA grants would be insufficient to fund construction for the desired Kawerak supplied prototype design. Both communities were forced to reduce building size and seek additional funding.

In March of 2003, Norton Sound Economic Development Corporation received requests from the Native Village of White Mountain and Chinik Eskimo Community to provide financial assistance for the construction of a multi-purpose building in White Mountain and

*Golovin EDA Multi-Purpose Building*

Golovin. The NSEDC Board of Directors approved \$250,000 for each proposal and in May 2003 NSEDC submitted Amendment 03-05NS and Amendment 03-06ND to the NSEDC 2003-2005 Multi-species CDP to the State of Alaska and National Marine Fisheries Service (NMFS). However, both the state and NMFS disapproved NSEDC funding these projects. NSEDC then filed an

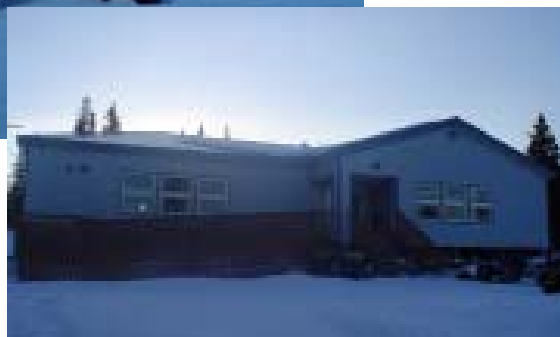

appeal with the NMFS Office of Administrative Appeals to reverse this decision.

After an extensive process of written communication, an oral hearing and producing of documents, NSEDC is pleased to report that the appeal process is over and that the NMFS Office of Administrative Appeals has reversed the previous decision and the amendments are now approved. This decision allowed NSEDC to provide funding to the Native Village of White Mountain and Chinik Eskimo Community for construction of their multi-purpose buildings.

The multi-purpose buildings in both communities are completed to a level of occupation and use. The funds received from NSEDC will be used to bring construction through its final stages, improve landscaping, and purchase building equipment. The multi-purpose buildings provide office space, headstart/day care facilities, sleeping quarters, and large multi-purpose rooms for community gatherings and meetings.

*White Mountain Multi-Purpose Building*

## St. Michael, Alaska

Submitted by Shirley Martin

### Introduction

The village of St. Michael is located on the south coast of the Norton Sound in Western Alaska. The village is positioned at the southern base of Saint Michael Mountain, a volcano responsible for forming the island. St. Michael's nearest neighbor is the village of Stebbins located twelve miles on the western end of St. Michael Island. There is a dirt road connecting the two communities. The St. Michael Bay is a transfer point for freight hauled from Seattle and Anchorage on large oceangoing barges to be placed on smaller river barges for shipment to other Norton Sound villages.

Access to St. Michael is by plane, by boat during the summer, and by snow machine during the winter. The community's airstrip was relocated in 1996 from the center of the village to a location approximately four miles away. Regular plane service arrives from Nome and Unalakleet daily. Barge service is provided each summer. Most travel within the community is by four-wheeler (ATV), snow machine, or foot, although there are some motor vehicles in the community.

Our current population is 413, 95% of which is Alaskan Native. St. Michael is a growing community; the population has increased by 19% in the past 9 years. St. Michael residents rely heavily on fishing, hunting, trapping and gathering activities. Residents take part in the commercial fisheries, primarily for herring. Most employment is seasonal and short-term. Part-time work includes commercial airline agents, local grocery store cashiers, reindeer herders, bookkeepers, a water plant operator, tribal program positions, and road maintenance crews. There are very few year-round employment opportunities in St. Michael

which include: City of St. Michael, Corporation, IRA Council, post office, and schools.

### Government

Saint Michael is governed by the Saint Michael Indian Reorganization Act (IRA) Council and the City of St. Michael. Each organization is comprised of a seven-member council. The IRA Council and the City council hold annual elections and have monthly meetings.

The responsibilities of the IRA Council include: oversight for the reindeer herd, tribal governance and enrollment, land management, economic development, historic/cultural preservation. The Council acts on behalf of the village to coordinate services and programs offered through state, federal, and private agencies. Funding for the Council's operations come from federal and state grants, Kawerak, Inc., and the reindeer herd.

The City of St. Michael was incorporated as a second class city July 15, 1969. The responsibilities of the City Council include: enforcement of local ordinances, road maintenance, utilities management, property management, taxation, fire prevention, economic development, and historic preservation. There is a 4% sales tax.

### Autobiography of Community Outreach Liaison **SHIRLEY MARTIN**

Waqaa Cingaciiit!! Hello, how are you? My name is Shirley Martin-Elachik. I was born on October 29, 1974, in Anchorage, AK to Peter Martin, Sr. of Stebbins and Helen Lockwood of St. Michael. I am the eldest daughter of 3 and had 4 brothers, one of which has passed on.

In my youth I grew up in Stebbins, Anchorage, and St. Michael. My grandparents, the late Lawrence Lockwood, Sr. and Irene, raised my sister and me since we were 9 and 10 years of age. My fondest memories with my grandparents include spending whole summers at their fish camp located approximately 3.5 miles south of our community, otherwise known as across the bay. It is a prime camping spot, as we would not travel far for native foods such as fish, berries, greens, kelp, and bird eggs. For those of us that have subsisted a great deal,

we know that camping is not an easy task; there is always something that needs to be done. It is activities such as hauling water, packing logs, sawing and chopping wood on a daily basis, to name a few, that conditioned me to be a healthy and strong young adult, which benefited me as an athlete in school related sports.

After receiving my high school diploma I lived in Nome for a short while, taking on part-time positions here and there before working my final job for Norton Sound as a CAN, after which I returned to St. Michael and started a family of my own. I married Richard J. Elachik on July 3, 2004. We have a 6-year-old son whose name is Gavin, 3 daughters – Ryleigh (4) and twin girls, Rhiannon and Sadie who just turned one year old on the 3<sup>rd</sup> of March 2005. I have tried to keep up in the workforce; however, my children's needs have led me to be a stay at home mom.

I have worked as the Community Liaison for NSEDC for the last 3 years now. It is a position that is suitable for me because I enjoy helping people and it allows me to spend more time with my family as opposed to a full-time job. Previous vocations I held include EPA, ANA and Wellness Coordinator and Grant Writer for the Native Village of St. Michael. I also worked for the City of St. Michael as a Bingo/Pull-Tab Monitor. At one time I performed as a Public Assistance Agent. One of my most enjoyable working experiences would have to be coaching the high school girls' basketball team, as this is something that I love and have been trying to get more involved with since having children. An equal to this would be working with our local elders in whatever need there was, even as simple as going over with and helping them to understand their mail.

My current capacity within the community is Councilwoman and Tribal Judge for the Native Village of St. Michael and Parent Head Start Committee President. I like living here because of close-knit ties with family, whether immediate or extended. Other reasons encompass the proximity to subsistence and nature, the rich history and basketball, basketball, and basketball.

### Biography of St. Michael Board of Director **VICTOR JOE**

Victor Joe was born in St. Michael, Alaska on June 8, 1940 to Jimmy and Mattie Joe. He attended grade school in St. Michael and graduated from Chemawa Indian School in Oregon. Victor then went to Seattle for three years where he did vocational training and completed a two-year internship to become a Journeyman Carpenter. Since then he has lived in St. Michael and worked on many carpentry projects.

Victor married Bernadette Tom on November 18, 1987. Together they had one child and adopted another; these children join the ten Bernadette had from her first marriage for a total of twelve children. Victor has too many grandkids to count.

In his free time, Victor enjoys carpentry projects, hunting, snowmachining, four-wheeling, and playing his guitar. He has represented St. Michael on the NSEDC Board of Directors since its inception in 1992.

# Education, Employment & Training

At the NSEDC Scholarship Committee meeting on October 13, 2004, three students were funded for the fall semester of 2004 - Rahnna Parker of Nome, Charles Menadelook of Little Diomed, and Benjamin Jack of Stebbins, for a total of \$3,450. Including returned scholarship awards for 2004, the NSEDC Scholarship Fund, as of December 31, 2004, has \$10,595.76 left out of the budgeted \$220,000 for the year. For 2005, the NSEDC Board of Directors increased the scholarship fund to \$225,000. Good luck to our students with their post-secondary and vocational education goals.

Hayley Asicksik of Anchorage/Shaktoolik was hired as the Glacier Fish Company Intern in Seattle in December 2004.

## NSEDC Scholarship Deadlines:

Fall 2005 Semester:  
**June 30**

Spring 2006 Semester:  
**November 30**

## NSEDC Seafood Processing Training:

**May 15-26, 2005**

Application Deadline is  
10 days prior to start date.

Twelve Norton Sound Residents – Thomas Barr, Arlene Barr-Shawn, Marian Marynowski, Ignatius Matthias, Jeanette Myre, Nixie Nick, Todd Nickoli, Bob Shawn, Nathaniel Simon, Alfred Snell, Milton Tom, and Ed Weston – worked on the F/T Pacific Glacier in the fourth quarter of 2004 bringing home \$84,838.04 in crew share wages. Nine processors – Paul Agibinik, Karl Dick, Bana Katchatag, Tim Kost, Edward Nakarak, Jr., Fred Pete, Ralph Sinnok, Terrance Southall, and Nathan Topkok – worked on the F/T Northern Glacier bringing home \$53,966.21. Johnnie Boyd, Fred Davis, Tim Katchatag, Daniel Mike, Derek Stepanoff, and Dan Walluk worked on the F/V Norton Sound and Brian Steve, Jr. worked on the F/V Glacier Bay bringing home a combined total of \$27,857.62. This brought the cumulative total from crew share wages from Glacier Fish Company for the 2004 fourth quarter to \$166,661.87 and the total for the entire year to \$844,166.67.

*F/V Norton Sound*

These wages earned brought the cumulative total from all processors from all companies from 1992-2004 to \$8,906,097.53. Of the figure, \$8,838,114.83 has been paid out as crew share wages from Glacier Fish

Company.

NSEDC sponsored a fisheries safety orientation class on October 17-28, 2004 at AVTEC in Seward. Seventeen Norton Sound residents with one out of Anchorage were given an opportunity to participate in the class for a total cost of \$33,383.18. Twelve trainees – Josephine Tocktoo of Brevig Mission, Rodney Ahwinona of Nome, Jeremy Sagoonick, Lars Sookiayak, Randall Takak, and Silas Paniptchuk of Shaktoolik, Johnnie Boyd and Shawn Southall of Stebbins, Percy Agloinga, Jr. of White Mountain, Richard Takak of Shaktoolik (living in Anchorage), Robert Brown of Unalakleet, and Benjamin Daniels of Elim – successfully completed the class.

NSEDC sponsored another fisheries safety orientation class on February 6-16, 2005, at AVTEC in Seward. Thirteen trainees – April James of Gambell, Eric Trigg of Koyuk, Kenneth Washington of St. Michael, Jason Eckels of Shaktoolik, Brian Odinzoff, Luke Thrasher, Martin Steve, Starretta Abdiu, and Sheila Odinzoff of Stebbins, Charles Okbaok, Denise Topkok, and Eric Pushruk of Teller, and Benjamin Head of Nome – completed their training making them eligible to work on the two Glacier Fish Company Factory Trawlers, the two long-liners, and the three crab vessels of Norton Sound Ventures. Good luck working on the high seas and safe sailing!!!
